2 superfici surfaces

La brillantezza e la profondità del colore si ottengono solo grazie al processo produttivo della bicottura tradizionale, con stesura a Campana di una grande quantità di smalto (2 kg/mq), oggi non più utilizzato nelle produzioni industriali di massa.

The brilliance and depth of colour are obtained only by the traditional double-firing process, using a large amount of glaze (2 kg/sq.m.) with "Campana glazing", which is no longer used today in industrial mass production.
