

DECORATED STONES

Diffusion Céramique innovates and creates for you the decorated stone, a product that had never been seen before.

Our natural stone gets a little makeover and wears fabulous designs to create a unique artisanal product.

We selected in our Turkish quarries the most beautiful natural stone which we printed astonishing designs on.

Ink gets into the veins of the stone which guarantees a resistant design and a tile whose beauty does not age. These made in France designs will make you travel all around the world thanks to their colours and patterns. Whether you like psychedelic mixes of colours, shades of blue or red, or black sobriety, you will find a design you love!

On walls or floors, outside or inside, these stones will add colour and brightness to your home. The incredibly soft touch of stone as well as the authentic aspect of these designs will seduce you and all of your guests.

This product exclusively produced and sold by Diffusion Céramique is about to revolutionise interior design. ■

Exclusivity

The wonderful travertine was the base of our designer's work.
Nina Farré enhances stone with her original and unique designs
that will make you travel all around the world.

Decorated stone will add nobility as well as a modern touch to your precious interior.

The innovative printing technique on a material such as stone guarantees a product of the highest quality.

The designs adapt to any kind of architecture, from the most classical to the boldest one. ■
